Fourth Grade STEM Education

Science, Technology, Engineering and Math

Hands-On STEM class every 3 days

Content Areas

- Energy and Habitats
- Electricity and Magnetism
- Water Cycle and Erosion
- Forces and Motion

Science and Engineering Practices:

Students will:

- Observe the world around them and ask investigable questions.
- Define problems and find solutions.
- Plan and carry out investigations.
- Collect and interpret results.
- Communicate their new learning, supporting their results with evidence and questioning the reasoning of others.
