Fifth Grade STEM Education

Science, Technology, Engineering and Math

Hands-On STEM class every 3 days

Content Areas

- Earth, Moon and Sun
- Sound
- Light
- Human Senses
- The Eye and Optical Instruments
- Variables and Experimental Design

Science and Engineering Practices:
Students will:

- Observe the world around them and ask investigable questions.
- Define problems and find solutions.
- Plan and carry out investigations.
- Collect and interpret results.
- Communicate their new learning, supporting their results with evidence and questioning the reasoning of others.
