

SCHOOL CALENDAR

The Board encourages and will support a school calendar, which has as its primary aim the enhancement of instruction. The calendar should be organized to promote the maximum coordination with area public and private schools.

The Superintendent will introduce a proposed calendar to the Board no later than the second meeting in January to be acted upon by the Board no later than the second meeting in March.

The administration shall be directed by the following in the formulation of the recommended school calendar:

1. The calendar will include an appropriate balance of sustained periods of instruction and scheduled days off from school.
2. School will generally not be held the last week of June. If bad weather days require making up school time, make-up days shall not take place past June 25th until the April vacation is utilized for make-up purposes.
3. If school days are lost after the April vacation is past, or the number of make-up days is so extensive as to require holding school into the last week of June in order to complete the necessary number of school days prior to June 30, the final week of June may then be used.
