

Bennet Academy Rocket Club Blasts Off

The Bennet Academy Rocket Club under the direction of sixth grade science teacher Bill McDougal first started 8 years ago at Keeney Street School. The idea started through program (SEMR) School wide Enrichment Model Reading clusters at Keeney. Mr. McDougal runs the club each year with the principal motivator being to get students excited about hands on rocketry and science. The rocket club is supported by (CATO) Connecticut Area Tripoli Organization. CATO is a sport rocketry club formed in 1998. CATO serves the Central and Eastern Connecticut sport rocketry community. Mr. Eric Henderson Vice President of CATO provides the state-of-the-art launching pads each year for the rocket club. Mr. Henderson's equipment and time given to the rocket club is always appreciated.
