## What's Today's News?

Our fourth and fifth graders are participating in  
Genius hour at Keeney School!

*During Genius hour all students are empowered to explore their own passions and promote creativity. Students choice what they want to learn during a set period of time weekly for 5 weeks.*

This self-direct opportunity allows students to research their interest, work independently or with a partner, and learn creative ways of presenting to their peers, through powerpoints, plays, interviews, commercials, etc.

Featured here is a fourth grade student who research "White-Out". She developed an outline of when white-out was developed, and by whom. In addition the student recorded herself making white-out."
