## What's Today's News?

**Many exciting things are happening in the hallways and classrooms at Washington...**

When you are able to take a visit to Washington, take a walk through the building and you are sure to see, and hear many exciting things happening in the hallways and classrooms. Recently, third graders completed a very impressive “Map Museum” where they showcased their physical and/or flat maps they had created at home with their families. All members of the Washington School community were invited to come walk through the museum. The map had to incorporate a theme with a shape and title to match the theme. They were scored on map elements (key, symbols, compass, labels, landforms, bodies of water) along with neatness and overall display. They did an amazing job showcasing all they learned in the map unit and were extremely imaginative in making their maps.
